the

DINOSAURS

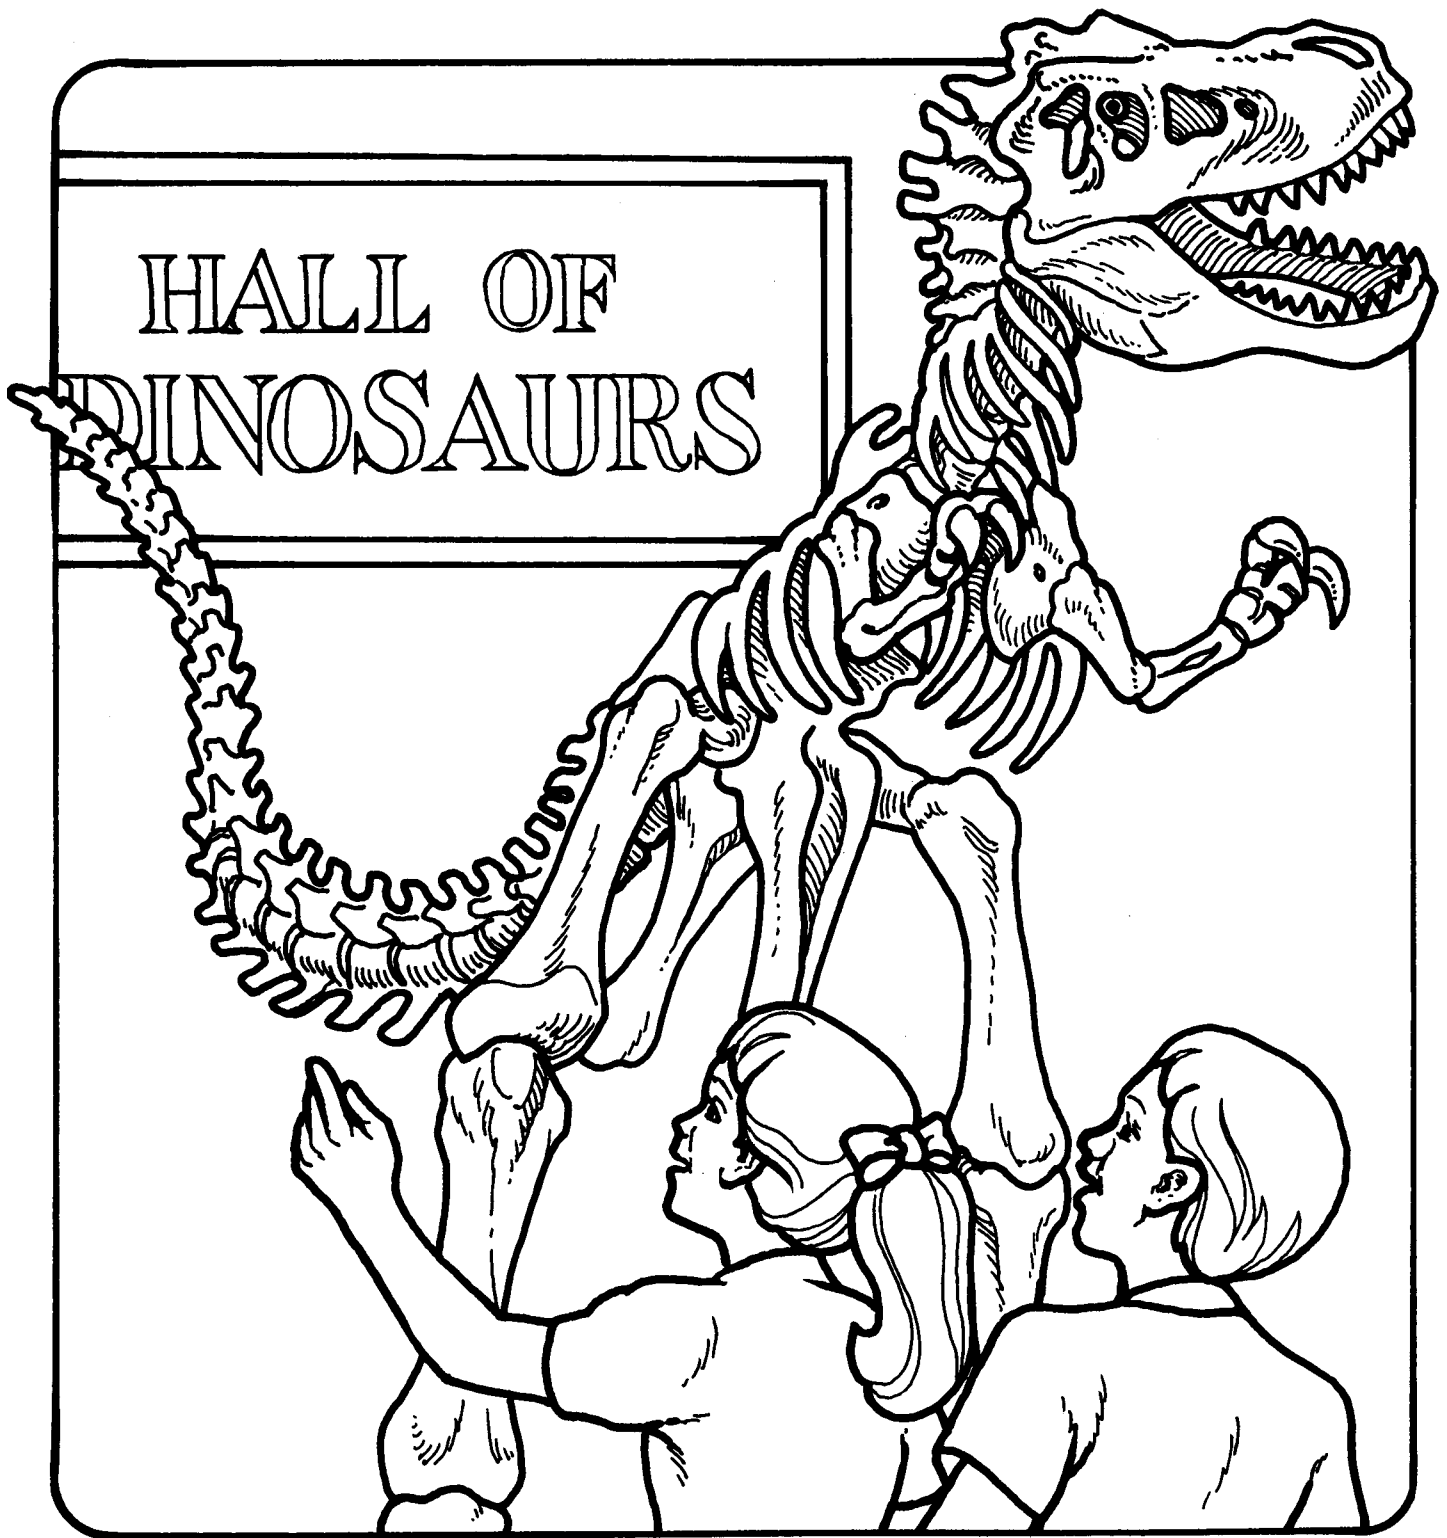

of the World

GOD CREATED
The
DINOSAURS
of the World

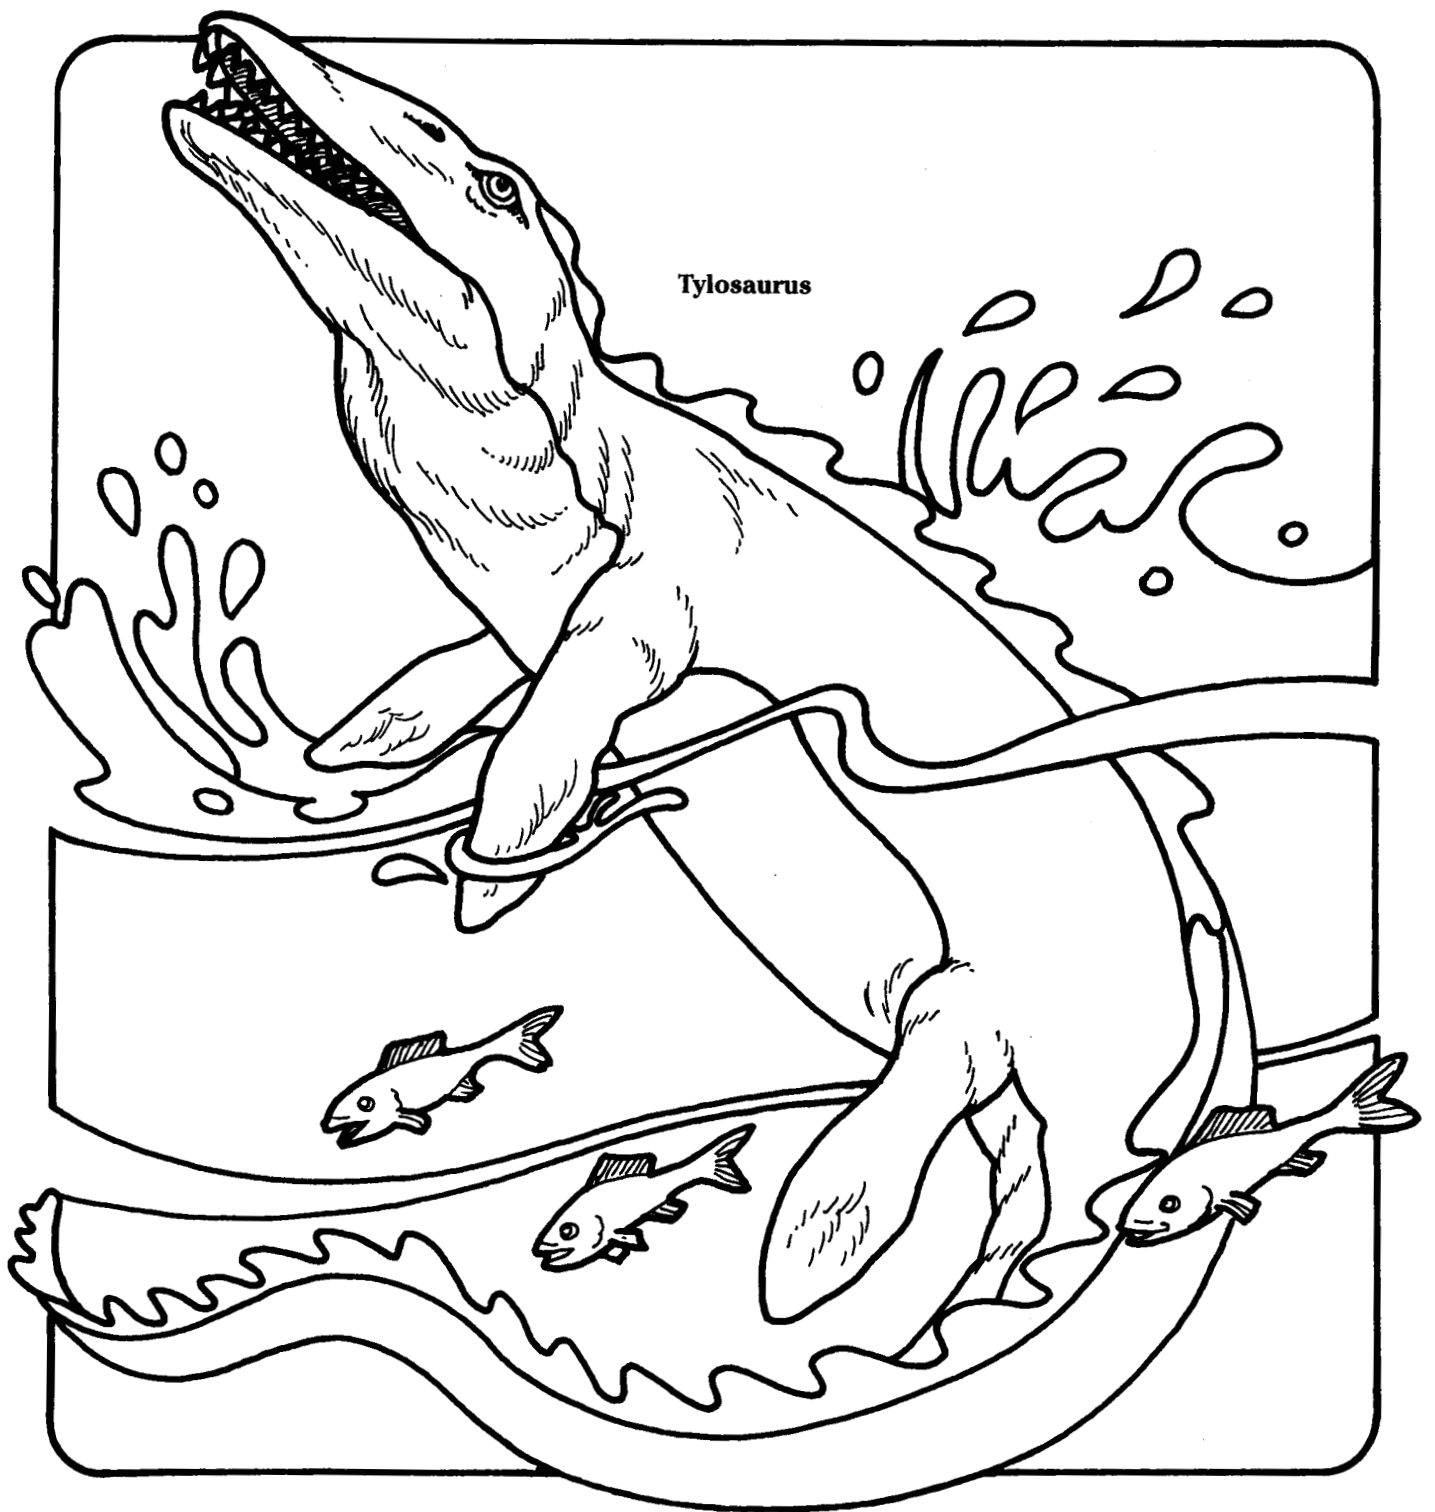

Written and Illustrated by
EARL and BONITA SNELLENBERGER

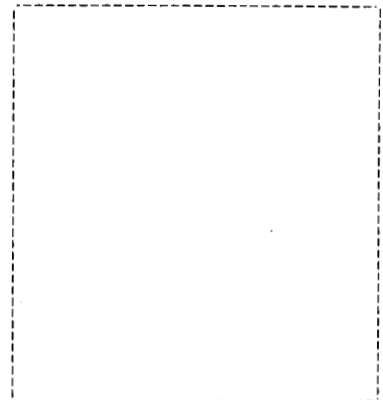

FOSSILS TELL US ABOUT DINOSAURS THAT ONCE LIVED UPON THE EARTH.

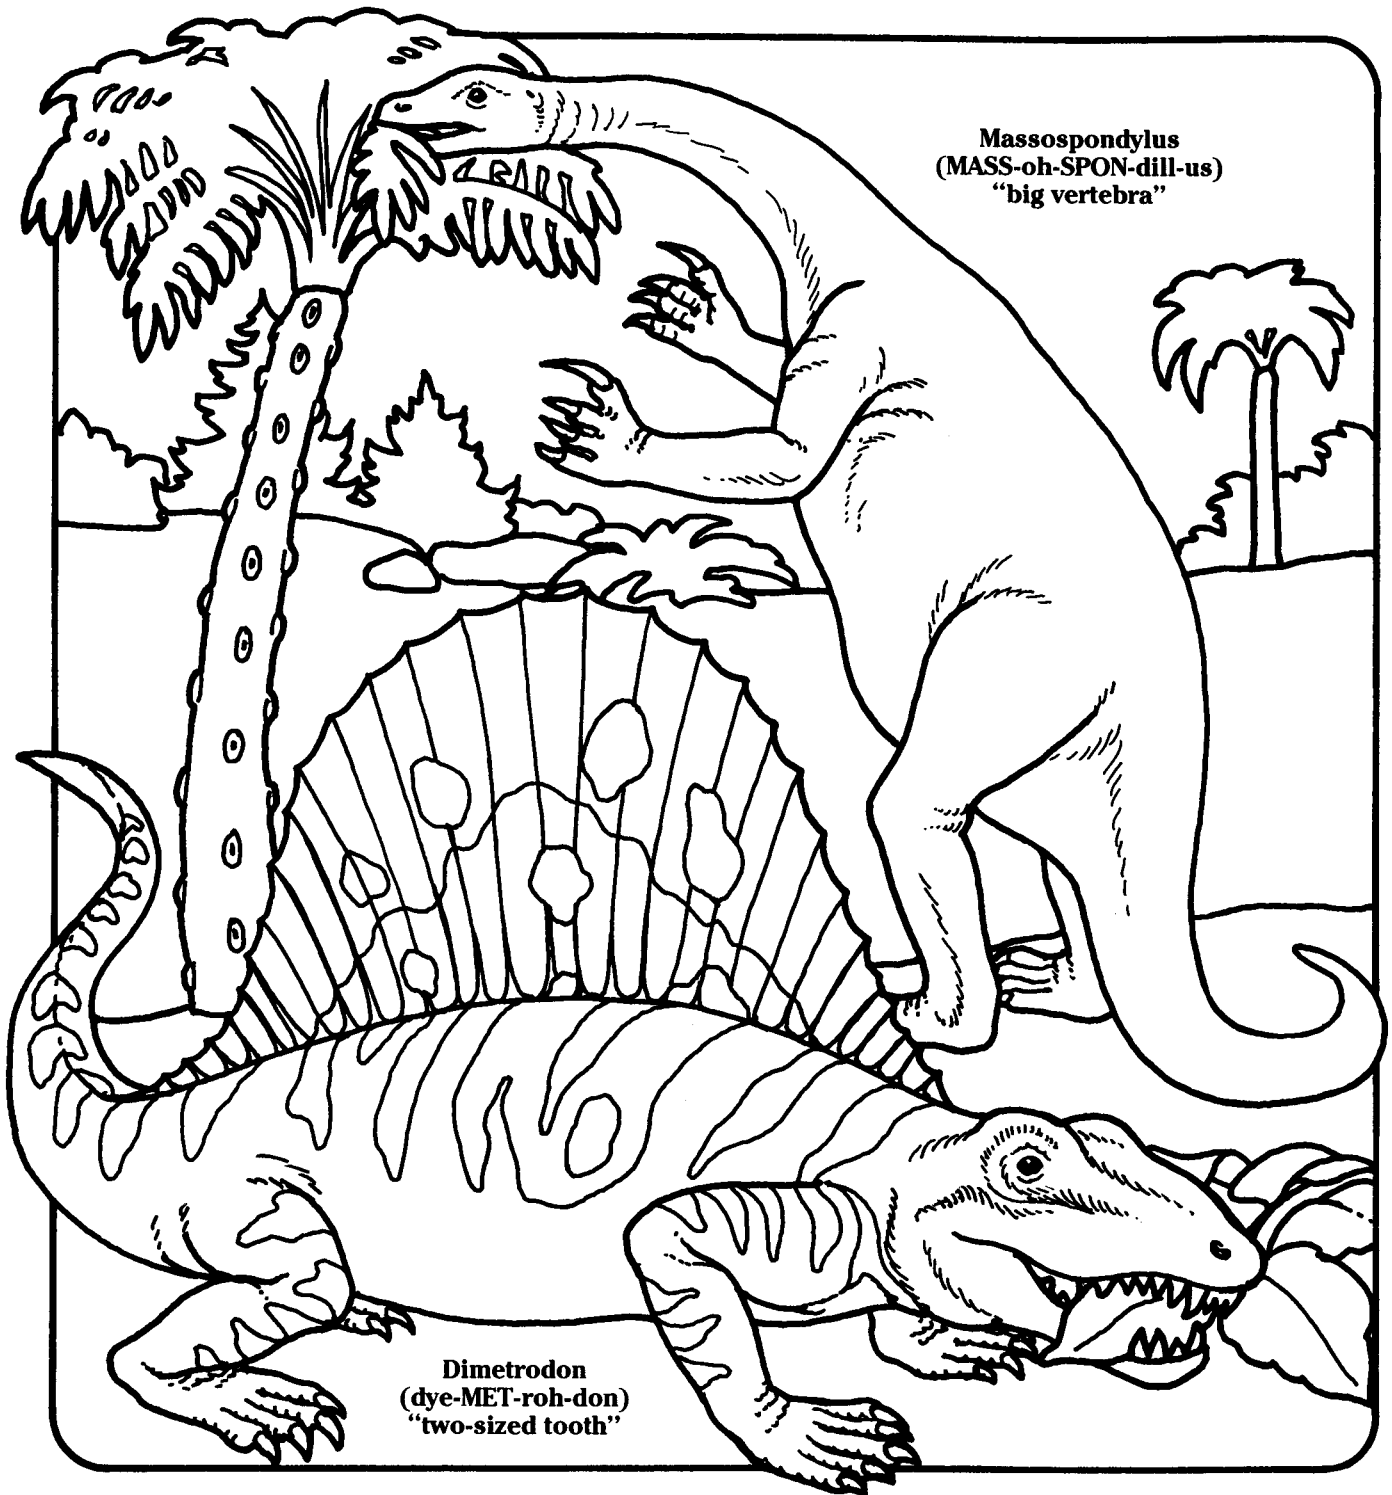

Dinosaurs were creatures that once lived upon the earth. Most of what is known about dinosaurs has been learned from studying their fossils. Fossils are the hard remains of living things that have been found in rocks. Scientists take great care in digging fossil bones out of the rock that surrounds them. And on rare occasions, they find enough bones to make a complete skeleton. Perhaps you have seen dinosaur skeletons in a museum.

GOD CREATED THE LARGE SEA LIZARDS.

While the giant sea creature above (Tylosaurus) is really a **marine** reptile, in body weight and in total length, the Tylosaurus (**TILE-oh-SAW-rus**) rivaled the largest land-dwelling dinosaurs. He measured up to 26 feet long and was completely aquatic. Tylosaurus was created by God on the fifth day of Creation Week (Genesis 1:21) "And God created great whales and great sea monsters" (NASB). Does Tylosaurus look like a great sea monster to you?

Massospondylus
(MASS-oh-SPON-dill-us)
"big vertebra"

Dimetrodon
(dye-MET-roh-don)
"two-sized tooth"

GOD CREATED THE GREAT DINOSAURS THAT LIVED ON LAND.

On the sixth day of Creation, "...God said, let the earth bring forth the living creature after his kind, cattle, and creeping thing, and the beast of the earth after his kind: and it was so" (Genesis 1:24). Dinosaurs were some of the most interesting beasts of the earth that God created. God made many different kinds of dinosaurs and other animals. Also on the sixth day, God created a man and a woman. Their names were Adam and Eve.
