# RUBBLE – The Broken Earth

## From Creation to Forever: A Timeline of Biblical History

The Holy Bible reveals that God's original Creation was perfect. However, suffering and death soon began when Adam sinned. Wickedness grew until the thoughts and actions of humans were only evil, continually. After more than one thousand years, God appointed a righteous man named Noah to build a huge ship on which God would save a remnant from overwhelming judgment.

When the Ark was finished and the animals and Noah's family were safely on board, God unleashed the earth-covering Flood. It broke apart the original landmass; for thousands of miles, Earth's crust cracked and fountains of the great deep exploded upward, releasing water and steam high into the world's atmosphere. Every human and every air-breathing, land dwelling animal not saved on the Ark, died.

During the year of Noah's Flood, Earth's vast broken plates catastrophically shifted. Mountains rose and seafloors sank. When the Ark came to rest, Noah's family and the animals left. Earthquakes and volcanic eruptions became less frequent, yet dense ash continued to fill the air. With sunlight severely reduced, continents cooled alongside warm ocean waters and caused massive evaporation. Temperatures dropped and snow fell in immense amounts for hundreds of years, creating huge glaciers and deep frozen waters—the Ice Age. Then, within only a few centuries, most of the ice melted and released the pent-up waters as the Ice Age ended.

The original world, ruined by sin, was washed away. We live in the rubble of the broken earth. Thankfully, final restoration will come when God's only begotten Son, Jesus, returns to save from eternal judgment all who repent and receive Him as Savior!
